TRANSOFT SOLUTIONS

TAKING FLIGHT INTO 2024

Dear Readers, welcome to the first edition of our 2024 Newsletter. It has been a busy start to the year, as I am sure the case has been for you too.

We've been actively engaged in introducing our new platform, AeroCENTRAL, which our Product Manager, Matthias Hildebrandt, elaborates on in an article in Future Airport magazine, see . We also continue to see strong traction for AirTOP as the product of choice among Air Navigation Service Providers for fast-time simulation.

On , we are delighted to feature in an article by DFS Deutsche Flugsicherung's, Alexander Gehres, on how DFS have integrated AirTOP WIZer ACC as an important part of their daily operations. You will also find details about the latest AeroSTRIPE webinar, enhancements to SkySAFE, and upcoming AviPLAN training opportunities in this issue.

We look forward to seeing you on the event circuit this year, in March at Airspace World in Geneva, and Passenger Terminal Expo in Frankfurt in April. And don't forget about our AirTOP User Group Conference in Paris, in April, if you have not yet registered see , as well as our French Aviation Software User Day in Toulouse on May 22, see .

Mark Rodrigues
Vice President, Aviation

WORD FROM PRODUCT MANAGEMENT

We've had an action-packed start to 2024, with our product and development teams all pushing to deliver the year's first round of product and project updates.

As highlighted on , January kicked off with the AirTOP 2024 release webinar, and shortly thereafter the first AirTOP 2024 update was shared with our users. February saw the release of SkySAFE 2024, as outlined on , and in the coming months the first update for AviPLAN 2024 will be ready too. Keep an eye on the My Transoft Portal for the new versions of these products.

Aside from work on updates to our core software products, notable long-term projects include significant new AirTOP WIZer enhancements, many of which have been driven by our engaged group of customers. Be sure to reach out to learn how AirTOP WIZer can help airports and air navigation service providers realize the benefits of fast-time simulations in a real-time operational environment.

And lastly, turn to of the newsletter to learn about AeroCENTRAL, our recently launched SaaS product designed to bridge the gap between airside operations and planning. Make sure you don't miss a live AeroCENTRAL product tour if you are at Passenger Terminal Expo in Frankfurt this April.

James Renner
Director, Aviation Operations

((o)) LIVE WEBINAR

Effortless Airfield Marking Design

Wednesday, March 20

REGISTER NOW →

AEROSTRIPE

Join the webinar on March 20 to learn about Transoft Solutions' intelligent airside marking design software, AeroSTRIPE.

Hosted by a Transoft senior product expert, hear how the AeroSTRIPE software streamlines airside marking design and enables accurate drawings.

The webinar will include the following:

- A live demo of the AeroSTRIPE software

- How to save valuable design time when drawing accurate airfield markings

- Creating runway, taxiway and apron markings, and quantity tables to help assess options and costs

- An opportunity to ask your questions about the software's capabilities

CHOOSE WHICH SESSION TO JOIN

Register for the webinar by choosing the session that suits your schedule best.

SESSION 1

March 20 | 2024
10 AM GMT | 11 AM CET | 2 PM GST

NEW PRODUCT RELEASE | SKYSAFE 2024

The latest version, which now supports Bricsys BricsCAD V24 and brings improved obstacle detection, reporting, and time-saving features, is released under Transoft Solutions' newly adopted annual versioning system.

NEW AND IMPROVED FEATURES IN SKYSAFE 2024

A new **Obstacle Charts** function provides runway and approach surface visualization and reporting in plan and profile views. Obstacles are displayed and labeled in each view. The tool's output matches the ICAO Type A Chart (Operating Limitations) format and is available for users of all regulations, including FAA and EASA

The **Evaluate Obstacle Intersection** report now lists all overlapping surface penetrations by one or more obstacles, eliminating the time-consuming task of generating surfaces one at a time to collate results

Now with **Create Obstacle**, multiple CAD objects can be selected from the drawing to create SkySAFE obstacles in a single action. Saving time and effort compared to previously having to create them one at a time

The **Create Obstacle import** function now supports formatted data to create obstacles as open polylines and closed polygons, which is in addition to the existing capability to import points

AVIPLAN | BOOK ONLINE TRAINING

Boost your AviPLAN skills by joining one of Transoft's product managers on an online training course. Be guided through important software features, learn how to resolve complex issues, and develop your overall understanding of AviPLAN.

Take a look at the upcoming course dates below and choose the session that suits your schedule best. Enhance your AviPLAN expertise even further by booking both courses at the same time and receive a 15% discount on the second course.

Recommended for the APAC region

NEW FEATURE ARTICLE

Learn how AeroCENTRAL, our new cloud-native software, can assist those involved in airside planning and operations, to streamline how they share key information - saving time, resource and reducing data duplication and error.

Turn to page 29 in the latest issue of Future Airport magazine to read the complete article with Transoft's Product Manager, Matthias Hildebrandt.

READ THE FULL ARTICLE →

DISCOVER MORE ABOUT AEROCENTRAL

Watch how the AeroCENTRAL platform enables airside operational teams and airport planners to publish and view essential aircraft parking stand data and specifications in one centralized location.

Hosted by a Transoft product expert, get an introduction to the new software, its key features, benefits, and first applications – Stand Guide and Specifications - in the on-demand launch webinar.

# MAKING A LEAP FROM THE SIMULATOR TO THE CONTROL ROOM – AND BACK

DFS Deutsche Flugsicherung GmbH, the German air navigation service provider (ANSP), has significantly enhanced how it forecasts and assesses traffic complexity and controller workload by integrating the AirTOP WIZer ACC tool into its daily operations. Where traditionally, DFS used fast-time simulations to predict air traffic flows and infrastructure needs, the adoption of WIZer ACC, brings these simulations directly into control rooms, allowing for real-time, data-driven decision-making.

The tool provides area control center supervisors, flow management positions (FMPs), traffic managers, and operational staff with a valuable and more interactive tool for simulating and assessing live air traffic and flow management.

This innovative use of simulation technology in a live operational environment was achieved through collaboration between DFS and Transoft Solutions. For the full story behind how fast-time simulators have made the leap back into ANSP control rooms and can support daily complexity and capacity analyses, click on the link below.

EVENTS ROUND-UP

Transportation Research Board (TRB) 103rd Annual Meeting, January 2024

Various Transoft teams met with visitors at the annual TRB meeting in Washington, DC, where there was a significant gathering of transportation professionals, innovators, policy makers, and researchers.

Transoft's Mark Rodrigues took this opportunity to visit Luis Felipe de Oliveira, Director General, ACI World, in Montreal, and exchange perspectives on the coming year.

MEET THE AVIATION TEAM

Francisco Javier Navacerrada Moreno
Business Development Manager, Aviation EMEA

CONNECT ON
LINKEDIN

Javier, a married father of three, is based at Transoft's Spanish office in Madrid. Having earned his degree in Aeronautical Engineering, Javier has dedicated the last 32 years to the fields of airport and transportation engineering. Javier's passion remains as vibrant as it was on the first day he took his first steps into the world of aviation.

What is your role at Transoft Solutions?

My professional journey is enriched in diversity, encompassing roles in construction, public entities, consulting firms, and entrepreneurship, which has shaped my versatile professional profile.

Currently serving as the Business Development Manager in the Aviation Business Unit, my responsibilities range from contracting and public tendering to sales. I carry out client demonstrations for AviPLAN, AeroSTRIPE, and SkySAFE products and lead AviPLAN training sessions across Spain and Latin America.

What exciting updates are on the horizon for Transoft in 2024?

Transoft's presence in the Spanish aviation market has seen significant growth, attributed to the widespread adoption of our products in airports and airspace.

I also develop educational projects in collaboration with several Spanish universities, including student training. Currently I am working on establishing our software as an integral part of a university's Aeronautical Masters program, scheduled to launch in the coming years.

Lastly, our commitment to enhancing product quality for clients is demonstrated by the conversion of perpetual to user subscription licenses, to ensure a higher standard of service.

Would you like to share any accomplishments or experiences related to Transoft?

I take pride in witnessing how our solutions bring about positive changes in our surroundings, and in July 2023, I was honored to conduct training sessions on the utilization of AviPLAN on the Galápagos Islands in Ecuador. The very place that inspired Charles Darwin's Theory of Evolution.

Given the increasing number of flights to this tourist hotspot, airport expansion posed a significant threat to the delicate environmental balance of the archipelago. The training focused on leveraging AviPLAN to optimize current resources, ensuring that the airport could manage the rising demand without compromising the area's sustainability. Consequently, the decision was made not to expand the airport.
