DISCUSSING GREENER SKIES

Dear Readers, welcome to the second Edition of our 2024 Newsletter. We have quickly reached mid-year, and it has been a busy and exciting first half of 2024.

I have just returned from the CANSO Global ATM Summit and AGM, hosted by Azerbaijan's ANSP, Azeraeronavigation (AZANS), who are a user of Transoft's AirTOP software. The CANSO summit focused on aviation's pathway to net zero, technology to support greener skies, and nurturing talent to shape the future of our industry. These are key drivers not only for the airspace side of our industry, but across the aviation ecosystem. These were also strategic themes at the ACI World Annual General Assembly, held this past May.

Mark Rodrigues and Simon Hocquard, Director General, CANSO, at the CANSO Global ATM Summit and 28th AGM.

Coming up, don't miss Product Manager, Matthias Hildebrandt, delivering a [webinar on AeroCENTRAL Stand Guide](#), where he will illustrate how operational information can be effectively shared between airside planning and operations, improving operational safety as well.

Also in this edition, we update you on the move from [Aircraft Data Viewer \(ADV\)](#) to AeroCENTRAL Specifications; provide a round-up from the [AirTOP User Group Conference](#), hosted by the French Direction Générale de l'Aviation Civile (DGAC); and inform you about [our new office](#) in Lille, France, with its transportation asset management software leveraging AI and computer vision. And please have a look at the AeroSTRIPE on-demand webinar, our time-saving, airfield pavement markings product, with Senior Product Manager, Alan Mason, on [page 5](#).

Lastly, I wish you an enjoyable and relaxing summer break, for those of you in the northern hemisphere.

*Mark Rodrigues
Vice President, Aviation*

WORD FROM PRODUCT MANAGEMENT

As we near the end of another busy quarter, it's a pleasure to once again summarize our recent product releases and see the value we've brought to our customers since the last newsletter.

Over the past months, we have released updates for AviPLAN; our CAD-based airside planning, design and operations software, AirTOP; our modular software for airport and airspace fast-time simulation, AeroCENTRAL; our new SaaS platform for sharing airside infrastructure and operations information,

SkySAFE; our software for aerodrome obstacle limitation analysis and compliance, and AeroSTRIPE; our software for designing regulation-compliant airside markings.

These updates brought new and improved features to help our customers complete their projects with increased efficiency and accuracy. In the coming weeks, we will release further updates for our flagship tools, AviPLAN and AirTOP, so keep an eye on the What's New pages on transoftsolutions.com and the My Transoft portal for details.

*James Renner
Director, Aviation Operations*

JOIN LATEST WEBINAR

Enhancing Airside Operations Through Streamlined Information Sharing

Thursday, June 27
9 AM EDT | 2 PM BST | 3 PM CEST | 5 PM GST | 5:30 PM IST

[REGISTER HERE →](#)

Join Transoft Solutions' Product Manager, Matthias Hildebrandt, on Thursday, June 27, for an insightful introduction to the new AeroCENTRAL Stand Guide application. Discover how this tool streamlines the sharing of key information to enhance airside operational efficiency.

Why join the webinar?

Sharing operational and infrastructural information between airside planning and operations, without losing crucial details, can be a challenge. This webinar demonstrates how you can minimize this challenge by using a centralized platform to publish, distribute, and view key airside information.

Live Webinar Highlights

- ✓ Why and how to simplify the sharing of key airside operational information
- ✓ An introduction and live demonstration of the AeroCENTRAL Stand Guide application
- ✓ An opportunity to ask a product expert your questions

Take the chance to join us and see how AeroCENTRAL Stand Guide can be used to share key details with the right people, in the right place, at any time.

Important update regarding Aircraft Data Viewer

We have some important and exciting news to share about Aircraft Data View (ADV) and our new product offering, AeroCENTRAL.

As we continuously develop and improve our cutting-edge technology, we are investing in AeroCENTRAL Specifications, an application on our recently launched AeroCENTRAL platform to replace Aircraft Data Viewer (ADV). As part of this process, we'll be helping ADV users move over to AeroCENTRAL Specifications.

What is AeroCENTRAL Specifications?

[AeroCENTRAL Specifications](#) hosts the most comprehensive online technical database of over 600 types of aircraft and additional planning data such as jet blast, door elevations, service points and service arrangements.

Retaining familiar ADV features, the AeroCENTRAL Specifications application also brings significant enhancements.

- ✓ As a cloud-based application, it provides quicker and easier access to the most up-to-date database of aircraft characteristics and details
- ✓ A more intuitive, user-friendly experience makes navigation and data retrieval simpler with a redesigned user interface. No download or installation is required
- ✓ Data is accessible no matter where you are, from any internet-connected device
- ✓ There are more options for comparing aircraft details, with information presented in a common and consistent format
- ✓ Additional filtering and sorting functions make it easier to identify and review critical aircraft models and associated technical data
- ✓ It seamlessly works with other AeroCENTRAL applications to support even more efficient airport operations

For further information, please see the [FAQs](#) or reach out to a [Transoft Solutions Account Manager](#).

ENHANCING AIRSIDE OPERATIONS

“Airports invest a lot of time and money into maintaining and improving their airside infrastructure.”

-Bernard Goodworth, Senior Product Manager, Transoft Solutions

Read the new in-depth blog post with Bernard Goodworth, on how our cloud-based platform, AeroCENTRAL, has the potential to transform the way airports around the world use and share airside operations information.

The platform, along with the applications that run on it, combines infrastructural information with operational data, in a centralized and user-friendly interface.

This essential information, such as the latest aircraft parking stand configurations, equipment locations and turnaround procedures, can be easily viewed, used, and shared amongst key stakeholders. By simplifying and streamlining information sharing, the platform reduces data duplication and supports safer and more efficient airside operations.

EFFORTLESS AIRFIELD MARKING DESIGN

Unlock the potential of Transoft's AeroSTRIPE software by watching Transoft's Senior Product Manager, Alan Mason, demonstrate its capabilities in an on-demand webinar.

Discover how AeroSTRIPE can save you valuable design time by learning how to easily create various types of markings, such as for runways, taxiways, and aprons. Also, gain valuable insights into the creation of quantity tables to help assess different options and costs.

TRANSOFT SOLUTIONS EXPANDS INTO FRANCE

Transoft's new office in Lille, France, is focused on innovative technology in transportation asset management and safety assessment.

Starting with the French market, with future plans to expand to the rest of Europe and later to North America, Transoft will be introducing advanced technology leveraging web application, AI, and computer vision to support transportation asset data collection, inventory, and condition assessment.

OFFICE RELOCATION

After over 30 years of being based out of Richmond, British Columbia, Transoft Solutions has relocated its headquarters to a new office in Vancouver.

"This strategic move is part of our ongoing commitment to growth, while providing a contemporary space for our team members. The office is conveniently located close to Waterfront Station and the Central Business District to encourage employees to use greener modes of transportation to help reduce our carbon footprint. This move underscores our dedication to providing the best possible work environment for our team members, enabling them to continue delivering innovative solutions and exceptional service to our clients."

-Jeannine Sheares, Director, Corporate Marketing

AIRTOP USER GROUP CONFERENCE 2024

In April, the AirTOP User Group Conference 2024 was held in Paris, hosted by DGAC (Direction Générale de l'Aviation Civile) and chaired by NATS.

The event gathered a wide range of aviation professionals who regularly use one or more AirTOP software modules. Presentations by AirTOP users addressed key topics like sustainability, Urban Air Mobility (UAM), and the EU's new Entry/Exit System (EES). These sessions sparked engaging discussions on effectively tackling these issues and how AirTOP can be utilized for aiding informed decisions.

It was great to be part of it and we look forward to joining again next year. If you would like to receive details about the 2025 AirTOP User Group Conference, please email us at infoaviation@transoftsolutions.com

EVENTS ROUND-UP

Airspace World, Geneva, Switzerland

In March, the Transoft Aviation team had the pleasure of exhibiting at Airspace World, in Geneva. As always, it was great to meet with our experienced users, as well as discuss our AirTOP software capabilities with interested expo visitors. We also enjoyed learning more about urban air mobility and the new environmental goals within the aviation industry.

Passenger Terminal Expo, Frankfurt, Germany

We also thoroughly enjoyed meeting our current and potential software users at this year's Passenger Terminal Expo in Frankfurt. It was a great opportunity to showcase our range of software, particularly AirTOP Terminal and AeroCENTRAL, and interact, and hear valuable feedback from our booth visitors. It is a great learning and networking event to meet with fellow aviation professionals.

TRAINING OPPORTUNITIES

Keep an eye out for upcoming online AviPLAN training courses.

Whether you're a novice or an experienced user, our online AviPLAN training courses provide you with a convenient and affordable way to get the most out of your software. Check our [website](#) or [LinkedIn](#) page regularly to see when online training courses are coming up.

For your convenience, we also provide private online training for all our software products. If you are interested in booking private training for your organization, please [contact us](#).

UPCOMING EVENTS

9th Annual SMART Airports & Regions Conference & Exhibition

July 10-12 | Denver, Colorado

6th Philippine Airport Modernization & Expansion Summit

July 17-18 | Manila, Philippines

Airport Operations & Technology Symposium

August 19-21 | San Jose, California

TELL US YOUR STORIES

We are always excited to hear about the innovative ways that users are utilizing our software. If you have worked on an interesting project or have a unique use case that you believe would be valuable to share with others, we would love to hear about it.

If you are interested in sharing your experience, please [let us know](#). We look forward to the possibility of highlighting your achievements!
